NO DIFFERENCE OF OPINION

Meeting Was Called to Consider Cecil Rhodes Scholarship-What Was Done and Said.

In the Herald of this morning, it is said at the head of an article, that a "Row Develops Among Regents" of the University of Utah and so on. The article is made up of misstatements from beginning to end, so far as the board of regents and all its members are concerned.

To the Editor: This statement is made by authority

of the board of regents, of the Univer-sity of Utah and the Deseret News is respectfully requested to help make this correction. JAMES SHARP, THE DISCREDITED STORY. What the Herald said was: A clash that came near being

erry row with the fur flying came to head yesterday in the board of regents of the University of Utah. Chairman James Sharp of the board, and President James T. Kingsbury were at cross-purposes, and the difficulties in-velved members of the Legislature, Mr. Sharp won his point, and everything new appears to be smoothed over.

The trouble arose over the measures now pending in the Legislature whi affect the university and the Agricul-tural college. One of these, introduced by Representative Willard Done, pro-vides the courses of study which are to be taught in each institution, other, also introduced by Mr. Annsolidates the governing boards of the two institutions. Another measure ntroduced by Senator Harden Bennion. is for the submission to the people

the two institutions. An agreement was reached last week between Mr. Sharp, representing the university, and W. S. McCornick, president of the board of trustees of the Agricultural college, defining the lines between the two institutions. According to this arrangement, the university was to have the school of mines, and the electrical engineering course, the Agricultural college was to teach civil and mechanical engineering and demestic science. The understanding was that the pending bills mentioned

were to be withdrawn.

Despite this agreement, it is stated, President Kingsbury continued his lobbying for the bills. This came to the ears of Mr. Sharp, and he was greatly angered. He called a special meeting of the board of regents yesterday afternoon to find out whether the board, after authorizing him to make the agreement, intended to stand by him. At this meeting the question of the accuracy of the published ac-counts of the agreement was raised. Mr. Sharp stood by the published ac-counts. As the agreement was merely verbal, it was decided that Messrs. Sharp and McCornick should get together and reduce it to writing, and that it would be approved when com-ing to the board in this form. This settled the controversy for the time be-
